FREEMEN OF MASSACHUSETTS BAY

A Freeman of this colony was a member of the body politic and as such entitled to exercise the right of suffrage and to hold office.

As early as 1631, in order to become a freeman, it was required that the applicant produce evidence that he was a member of the Congregational church. But this regulation was modified in 1664. Freemen were admitted by the General Court of the colony.

FREEMAN'S OATH

I, A. B., being by the Almighty's most wise disposition become a member of this body consisting of the Governor, Deputy Governor, Assistants and Commonalty of the Massachusetts in New England, do freely and sincerely acknowledge that I am justly and lawfully subject to the Government of the same, and do accordingly submit my person and estate to be protected, ordered and governed by the laws and constitutions thereof, and do faithfully promise to be from time to time obedient and conformable thereunto, and to the authority of the said Governor and Assistants, and their successors, and to all such laws, orders, sentences and decrees as shall be lawfully made and published by them or their successors. And I will always endeavor (as in duty I am bound) to advance the peace and welfare of this body or commonwealth, to my utmost skill and ability. And I will, to my best power and means, seek to divert and prevent whatsoever may tend to the ruin or damage thereof, or of any the said Governor, Deputy Governor, or Assistants, or any of them, or their successors, and will give speedy notice to them, or some of them, of any sedition, violence, treachery, or other hurt or evil, which I shall know, hear, or vehemently suspect, to be plotted or intended against the said commonwealth, or the said Government established. And I will not, at any time, suffer or give consent to any counsel or attempt, that shall be offered, given, or attempted, for the impeachment of the said Government, or making any change or alteration of the same, contrary to the laws and ordinances thereof; but shall do my utmost endeavor to discover, oppose and hinder all and every such counsel and attempt. So help me God.

At the General Court held at Boston, May 14, 1634: It was agreed and ordered, that the former oath of freemen shall be revoked, so far as it is dissonant from the oath of freemen hereunder written; and that those that received the former oath shall stand bound no further thereby, to any intent or purpose, than this new oath ties those that now take the same.

FREEMAN'S NEW OATH

I (A. B.,) being by God's providence, an Inhabitant, and Freeman, within the Jurisdiction of this Commonwealth; do freely acknowledge my self to be subject to the Government thereof: And do therefore do here swear by the great and dreadful Name of the Ever-living God, that I will be true and faithfull to the same, and will accordingly yield assistance & support thereunto, with my person and estate, as in equity I am bound; and will also truly endeavor to maintain and preserve all the liberties and privileges thereof, submitting my self to the wholesome Lawes & Orders made and established by the same. And further, that I will not plot or practice any evill against it, or consent to any that shall so do; but will timely discover and reveal the same to lawful Authority now here established, for the speedy prevention thereof.

Moreover, I doe solemnly bind my self in the sight of God, that when I shall be called to give my voice touching any such matter to this State, in which Freemen are to deal, I will give my vote and suffrage as I shall judge in mine own conscience may best conduce and tend to the public weal of the body, So help me God in the Lord Jesus Christ.

This oath was printed at Cambridge by Stephen Daye, in 1639. It is said to have been the first paper printed in New England.

The names of freemen given in the following list are spelled as found in the Colonial records, so far as they can be deciphered and transcribed. They are not the autographs of the persons who bore these names, but are as written in the record by the secretary, who probably spelled them as pronounced to him and evidently made some errors. People did not spell so accurately then as now. We know that the persons named, in many instances, spelled their names differently from the forms given in the records.

These records are important to those engaged in historical and genealogical pursuits.

A large per cent of the native population of New England as well as their descendants elsewhere descend from the persons named in this list.

The form of list here given, being alphabetical, greatly facilitates the labor of examination.

PUBLICATION NUMBER ELEVEN

SHIP MODELS HOW TO BUILD THEM

By CHARLES G. DAVIS
Naval Architect

Illustrated by the Author

MARINE RESEARCH SOCIETY
Salem, Massachusetts
1925

Fig. 36. Holding the Block

Fig. 105. Hatchway

For some time there has been a growing demand for a book on building models of sailing ships. The model yacht and the sailing boat have their manuals but information relating to the various types of square-rigged vessels lies buried, here and there, in the pages of many volumes or remains unrecorded. The practical disappearance of the square-rigged ship and the passing of the old-time sailor who could supply the required information, also makes it exceedingly difficult for the builder of ship models to obtain first-hand information on those details so essential in constructing a model built to scale and correctly fitted and rigged. It is with great satisfaction, therefor, that the *Marine Research Society* announces the publication of a handbook treating the subject in a thorough manner and illustrated with 165 drawings and full-page plates covering every detail of the construction of a ship model.

It is a practical tool by an expert model builder, written for the beginner and also the experienced builder.

The volume supplies complete instructions as to proper equipment and the various progressive stages to be taken in the laying out and construction of the hull and fittings. The clipper ship "Sea Witch" has been selected as typical vessel to build in model form and in a pocket at the end of the volume will be found scale plans supplying exact lines for the hull and also a sail plan. There is a useful table of "offsets" and a belaying pin layout for a clipper ship—necessary information not to be found in any book.
